

THOMA-SHOT

Concrete with improved performance for shotcrete

PRODUCT DESCRIPTION:

THOMA-SHOT is a family of concrete products with improved performance for shotcrete and extruded concrete applications

APPLICATIONS:

- Pool shells
- Skate parks
- Soil stabilization
- Nail walls
- Curb
- Slip form paving
- Barrier walls
- Tunnel lining

BENEFITS:

- Rebound reduction in shotcrete
- Less need for multiple layers due to increased build up in a single pass (up to 18 inches)
- Reduced pump line pressure
- Improved surface characteristics
- Less re-work to slip form concrete
- More cohesive mix to reduce segregation

FINISHING:

- Normal finishing process for the application
